## User Friendly Design

Ergonomic front handlebars makes your transition to long arm quilting a breeze. An intuitive LCD touch screen keeps stitch settings at your fingertips. The open design of the sewing head and front handle bars provides a clear line of sight at all times. Keeping an eye on each stitch of your quilt design has never been so easy.

## Convenient Features

Sewists love the built-in magnet bar feature to keep scissors and pins within easy reach. No more messy thread nests to contend with; the telescoping thread stand allows for consistent thread delivery and tension; no matter the thread type.

## Solid Design and Construction

Designed and built to last; the cast aluminum sewing head provides stability sewists require when sewing at high speeds. Backed by a 5 year mechanical and electrical; 10 year casting warranty, the QMP 16 will provide years of worry free quilting.

## Pro Frame 5

The compact 5' free-standing frame with adjustable leg height has a 5' x 4' foot print that is perfect for any small sewing studio space.

- Compatible with both the QMP 16 and QMP 18 models
- Effortlessly hoop your quilt with the Hoop-Frame technology to achieve seamless quilting
- Easy-assembly professional grade system made from high quality steel
- Innovative clamp management system for easy operation

## Variable Stitching Control

With 2 Modes of Stitch Regulation (Precision and Cruise), perfection comes easy when operating at speeds of up to 1,800 stitches per minute on the QMP 16.

- With variable stitch control you can quilt at your own speed and comfort level to create perfect stitches regardless of skill level

# PRO-STITCHER

A Pro-Stitcher will take your long arm quilting to the next level. By adding advanced robotics that provide 500 built-in designs, intuitive menu controls and a large 12" touch screen you will speed up the quilt making process with precision and ease.

Optional Pro-Stitcher for QMP 16, shown on the QMP 18.

## Pro-Stitcher Features

- Large 12" touch screen
- 500 Built-in designs
- Resize, rotate, repeat designs to fill areas
- Crop inside or outside the defined area
- Customizable speeds
- Easy to understand menus and controls allows for precise positioning and control
- Computer guided quilting to free motion quilting
- View designs at full size before quilting
- Mark and record multiple points for accurate stitch-in-the-ditch quilting
- Built-in ruler tool for measuring in any direction
- No additional computer needed to run software
- USB port allows for easy upload of new design

## Take the Next Step

The Quilt Maker Pro 16 provides all of the tools a sewist needs to speed through the next quilting project with ease. Whether you choose to free-motion or ruler your quilts, two dedicated modes of stitch regulation (Precision and Cruise) deliver accurate stitching at speeds from 4 to 18 stitches per minute. Intuitive interactive controls on the LCD touch screen guide the creative process, ergonomic handle bars with built-in controls provide the precision and plenty of time saving features makes this a perfect choice for any creative sewist looking to take the next step on their quilting journey.

### Bright Led Lighting

Mounted directly above the needle, a ring of LEDs clearly illuminates your sewing area no matter the time of day, providing the best visibility you need to quilt with precision and accuracy.

## Versatile QMP 16 Options:

### Rear Handle Bars with a Pantograph Laser Light

Bring your quilts to life with an optional rear mounted pantograph laser light that will allow you to create seamless edge to edge designs for a professional finish on all your quilting projects.

### 16" RULER BASE ACCESSORY

The optional 16" Ruler Base provides the needed stability when using rulers, guides and templates - a must have add on for the serious professional looking to rule their quilts.
