

# Can Do Koozie

Created by: JonPaul Alfano

Sip on a frosty beverage without getting frosty fingers! Make your own beverage koozie to keep your drink cool, not your hand. The following instructions are for a can, but this could also be applied to a bottle adjusting the seam allowance to compensate for the space.

Skill Level: Beginner

Time to Complete: 5-10 mins

## Supply List

1. 10 1/2" X 4 1/2" of Material: cotton, vinyl, pleather, or other
2. Scissors or Rotary Cutter
3. Pen, pencil, or marker
4. Ruler
5. Heavy duty Janome sewing machine
6. Beverage container of choice!

## Janome Supplies

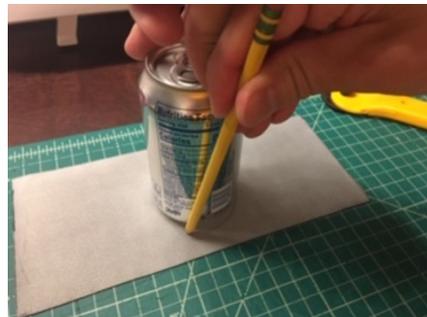

1. Any Janome machine
2. Janome Red Tip Needle

## Construction Instructions

1. Measure out a rectangular shape of 10 1/2" x 4 1/2" and cut.

2. Place the can in the center of the material, and trace a circle, if you are not sure where the center is, you can fold the material in half long ways and line it up accordingly.

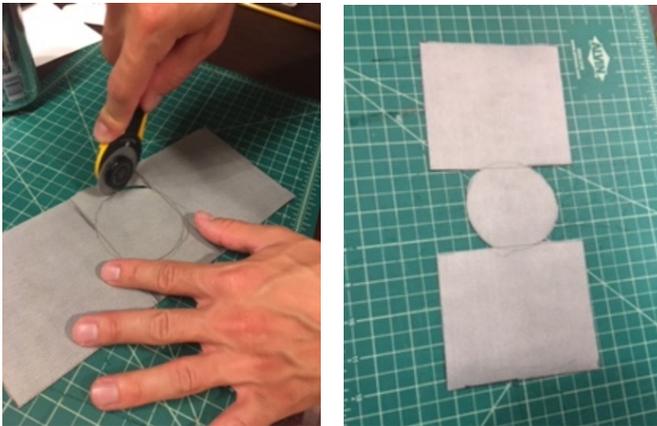

# Can Do Koozie

3. Draw two 2" lines parallel to the circle on the narrow sides of the fabric.

4. Cut away the previously marked lines as shown.

5. Fold the material face sides together, line up and sew along the edges as shown. For this a 1/4" seam allowance but it can be adjusted depending on the thickness of the material and size of can.

6. Turn Material Right side out. Once turned right side out, slide onto your beverage and enjoy!!
